Supervisor: Leann Sears

From: April 2021 **To:** Present
Job Description: Cashier/CSS/Trainer

PERSONAL

Desirable Traits: Curious, Passionate, Determined, Humble

INTERESTS AND HOBBIES

In the past four years of high school, I have formed new interests and kept old ones. I've become increasingly interested in Engineering, CAD, and programming. I do Skills USA for mechanical design: I won districts, gold, and went to state. I also did TSA for Python programming and competed in the state competition in 2021 and plan again in 2023. I have applied my CAD (computer-aided design) knowledge in community service by making nameplates for all teachers and staff at Fern Creek by engraving names into a piece of acrylic. I enjoy working at Dick's Sporting Goods, as I work with people of all ages across various sports and hobbies. Through Dick's, LYPC, NHS, and other service opportunities, I can help my community and make an impact. Helping people has always been a priority, whether through community service, work, or asking people, "How are you?" Over the last two years, health and fitness have also become increasingly important to me. Going to the gym has increased my self-awareness and discipline, and my overall well-being has improved. Through all these passions, I've been driven to keep going and am curious to continue exploring and learning more about these various activities and interests.
